Compounding Base Information

For questions or recommendations on compounding bases - talk to our Pharmacists. Pricing shown is based on the standard prescribed base. Alternative bases may incur an additional charge.

Common Dermatology bases -

ExoBlue features a powerful blend of peptides, exosomal signaling support, and copper-zinc cofactors. May make a difference for patients who want to improve the appearance of fine lines, wrinkles, skin texture, hydration, and overall visible skin renewal.

PracaSil-Plus features a proprietary blend of ingredients. May make a difference for patients who want to improve the appearance of scars, including keloids and acne scars.

Clarifying is a noncomedogenic cream base that may be ideal for patients with skin health challenges such as acne and rosacea. It may help improve the appearance of red, blotchy skin.

XemaTop may be used for patients suffering from eczema, psoriasis, and dry skin. It may improve the appearance of red and irritated skin.

VersaBase Lotion may be used for patients with dermatological, cosmetic, and HRT needs. A wide array of active ingredients can be incorporated into it.

Plasticized base is a polyethylene and mineral-oil gel base used for topical and oral preparations. It is great for water-sensitive active ingredients.

Emollient cream is great for incorporating a variety of active ingredients and can also be used vaginally. This base is hardy and thick, versatile and resilient.

Common Hormone bases -

VersaBase Cream is ideal for topical and vaginal HRT. It simulates the natural moisturizing barrier of the skin through its emulsion system and rubs in quickly, leaving a soft and silky feel.

Atrevis Hydrogel is an advanced topical compounding base that drives testosterone replacement therapy medications far beyond the reach of other pharmacy compounding bases.

VersaBase Gel in combination with MucoLox may be used for patients with vaginal and rectal conditions that would benefit from enhanced mucosal adherence. It is extremely stable and can be used topically, vaginally, and rectally.
